

STATE OF THE MEDIA:
THE SOCIAL MEDIA REPORT

Q3 2011

SOCIAL MEDIA

's popularity continues to grow, connecting people with just about everything they watch and buy. Whether it's a brand icon inviting consumers to connect with a company on LinkedIn, a news ticker promoting an anchor's Twitter handle or an advertisement asking a consumer to "Like" a product on Facebook, people are constantly being driven to social media. The latest Nielsen insights provide some answers on exactly how powerful this influence is on consumer behavior, both online and off.

In the U.S., social networks and blogs reach nearly 80 percent of active U.S. Internet users and represent the majority of Americans' time online. The value of the time consumers spend online and on social networks and blogs continues to grow, most visible through the influence on purchase decisions. For instance, 60 percent of people who use three or more digital means of research for product purchases learned about a specific brand or retailer from a social networking site. Forty-eight percent of these consumers responded to a retailer's offer posted on Facebook or Twitter.

As the influence of social media – and those using social media – continues to grow, it's crucial for traditional media, retailers, brands and advertisers to understand how different consumer segments use and share content. Nielsen's "State of the Media: The Social Media Report – Q3 2011" presents a snapshot of the current social media landscape and audiences in the U.S. and other major markets.

KEY FINDINGS

- Social networks and blogs continue to dominate Americans' time online, now accounting for nearly a quarter of total time spent on the Internet
- Social media has grown rapidly – today nearly 4 in 5 active Internet users visit social networks and blogs
- Americans spend more time on Facebook than they do on any other U.S. website
- Close to 40 percent of social media users access social media content from their mobile phone
- Social networking apps are the third most-used among U.S. smartphone owners
- Internet users over the age of 55 are driving the growth of social networking through the Mobile Internet
- Although a larger number of women view online video on social networks and blogs, men are the heaviest online video users overall streaming more videos and watching them longer
- 70 percent of active online adult social networkers shop online, 12 percent more likely than the average adult Internet user
- 53 percent of active adult social networkers follow a brand, while 32 percent follow a celebrity
- Across a snapshot of 10 major global markets, social networks and blogs reach over three-quarters of active Internet users
- Tumblr is an emerging player in social media, nearly tripling its audience from a year ago

Social Networks and Blogs: Still the Top Destination Online

Social Networks and Blog sites rule Americans' Internet time, accounting for 23 percent of time spent online, more than twice the amount of time spent on the #2 category, Online Games. To further put this into context, time spent on the 75 "Other" online categories combined only accounts for 35 percent of Americans' total Internet time.

She is likely Asian or Pacific Islander

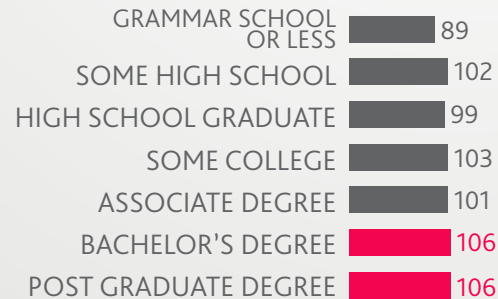

LOCATION

She likely lives in New England

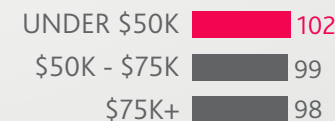

EDUCATION

She has obtained a Bachelor's degree

HOUSEHOLD INCOME

Her household income is less than \$50,000 per year

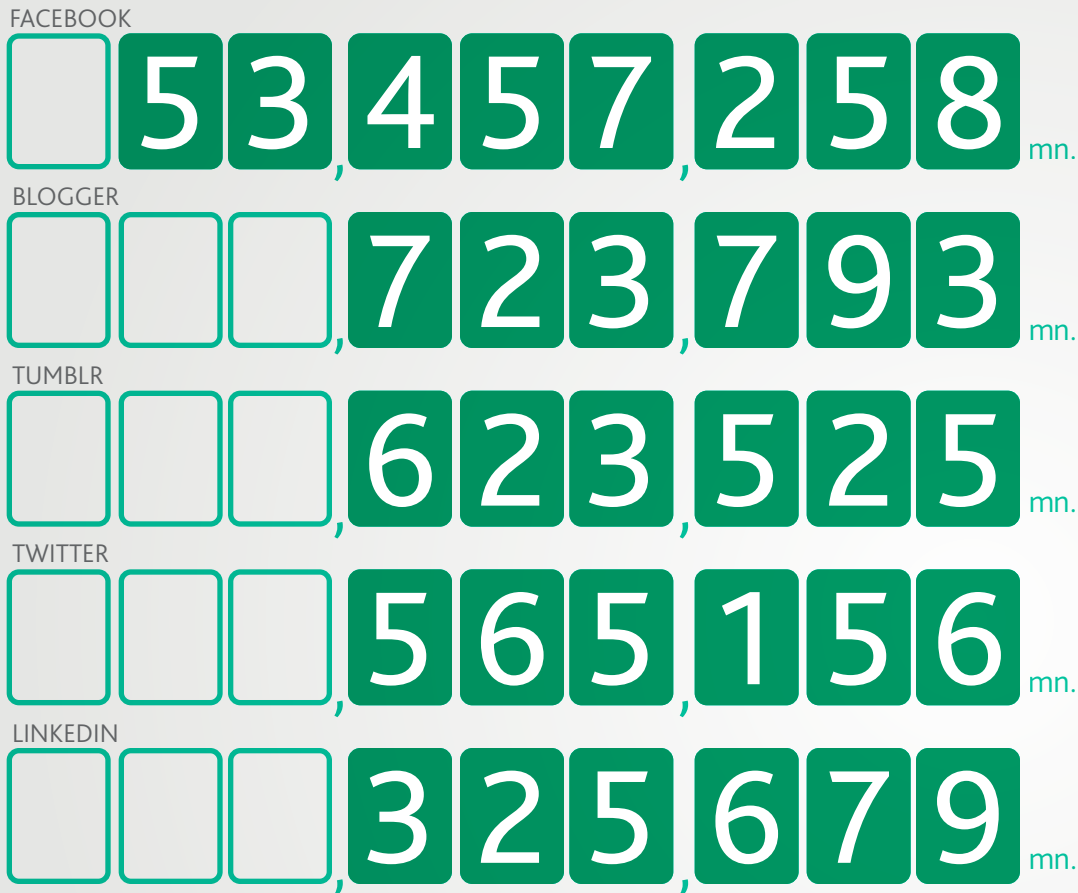

Men are More Likely to Visit LinkedIn and Wikia

Social networking as a whole skews female – and so do nine of the top 10 U.S. social networks and blogs – but LinkedIn and Wikia are the only sites in the category where the percentage of men visiting the respective site exceeds the percentage of total active male Internet users (47%). Facebook continues to reign supreme as the top U.S. social network with over 140 million visitors during May 2011 – nearly 3-times the audience of the #2 site, Blogger – and reaching 70 percent of active U.S. Internet users.

Over Twice as Many People Aged 55+ Visit Social Networking Sites on Their Mobile Phone than Last Year

As app usage in the U.S. continues to grow, it might be assumed that growth is at the expense of the Mobile Internet. This is not the case. Mobile Internet usage - the use of a browser on a mobile device - is alive and well with the unique number of Mobile Internet users in the U.S. up 47 percent over the last year. The Mobile Internet audience to social networking sites is up 62 percent during the same period, as publishers continue to optimize their content across a new generation of connected devices.

Active Social Media Users are Influential Offline

Consumers frequently trust the recommendations of their peers, making social media an ideal platform for influencers to spread their ideas and purchase power. Research by NM Incite shows that 60 percent of social media users create reviews of products and services. In fact, consumer-created reviews/ratings are the preferred source for information about product/service value, price and product quality. Offline, active adult social networkers are more likely than the average adult Internet user to be found at political rallies, professional sporting events and working out at the gym.

Social Networking around the World

Social networking is indeed a global phenomenon. In a look across a sample of 10 global markets, social networks and blogs are the top online destination in each country, accounting for the majority of time spent online and reaching at least 60 percent of active Internet users.

1 AUSTRALIA

Among Nielsen's 10 Internet-metered markets, Australian Internet users spend the most time visiting social networks and blogs, averaging 7 hours, 17 minutes per person

2 BRAZIL

Orkut is the #1 social networking and blog site in Brazil, visited by 30.3 million Brazilians in May 2011, 11 percent more visitors than #2 site Facebook

3 FRANCE

Nearly a quarter of active French Internet users - 9.6 million - visited #2 social networking site Overblog

4 GERMANY

German Internet users spend more time on social networks and blogs than they do any other online category of sites, a total of 12.7 billion minutes during May 2011

5 ITALY

Italian Internet users spend nearly one-third of their time online visiting social networks and blogs (31% of total Internet time)

6 JAPAN

FC2 Blog – the top social networking site in Japan during May 2011 – was visited by over half of active Japanese Internet users

7 SPAIN

Although Spanish Internet users spend the most total time on #1 site Facebook, they average the most time per person on #4 site Tuenti (4 hours, 42 minutes per person)

8 SWITZERLAND

Social networks and blogs reach 60 percent of active Internet users in Switzerland

9 U.S.

Blogger is now the number #2 social networking and blog site in the U.S. with 50.1 million unique U.S. visitors, up 17 percent from a year ago

10 U.K.

Internet users in the U.K. viewed 229.6 million pages on Tumblr, the second most page views on any social network or blog in the country after Facebook (20.2 billion page views)

FOOTNOTES

2-5 Nielsen, NetView, Home & Work (May 2011).

6 NM Incite, State of Social Media Survey (April 2011). NM Incite's 'State of Social Media Survey' is based on a representative sample of 1,865 adult (18+) social media users who were recruited from the Nielsen Online Panel to take an online survey. "Social media user" is defined as participating, talking, and networking online through various platforms to share information and resources. This includes Internet forums, blogs, Facebook, Twitter, video sharing, consumer rating and other social networking websites. The survey fielded from March 31 to April 14th.

7 Nielsen, Apps Playbook (Q1 2011). Nielsen's App Playbook Q1 2011 is based on a survey of 4,339 mobile subscribers who reported having downloaded a mobile app in the past 30 days. The respondents completed an online, self-administered survey in March 2011.

8 Nielsen, Mobile Media View, All Carriers (May 2011) .

9 Nielsen, VideoCensus, Home & Work (May 2011).

10 Nielsen, @Plan (Release 2 2011). "Active social networkers" is defined as Adult Internet users with 1+ social networking profile AND Posts links/articles/videos/websites. Consumer product review data provided by NM Incite (State of Social Media Survey)

11 Nielsen, NetView, Home & Work (May 2011). Buzz data provided by NM Incite (May 2011)

12 Nielsen, Global Index (May 2011). Nielsen has meter-measured Internet data in 10 major markets: Australia, Brazil, France, Germany, Italy, Japan, Spain, Switzerland, U.K. and U.S.
